SUMMARY

Full-stack developer building production-ready SaaS applications using Next.js, TypeScript, and PostgreSQL. Experienced in designing scalable backend systems, multi-tenant architectures, offline-first PWAs, and responsive web applications for real-world users.

PROJECTS

Kalvora - Proposal Automation SaaS

kalvora.kalipr labs.in

Next.js, TypeScript, Supabase, PostgreSQL

- Built and deployed a full-stack SaaS platform for interior designers handling proposal creation, approvals, invoicing, and analytics.
- Actively used by early-stage customers.
- Designed multi-tenant PostgreSQL schemas with Row Level Security and role-based access control workflows.
- Automated server-side PDF generation using Browserless APIs, reducing manual proposal creation time by 80%.
- Developed responsive multi-step proposal workflows with reusable React components and onboarding flows.

Rentify: Multi-Role Real Estate Platform

rentify-properties.in

Next.js, TypeScript, Prisma, PostgreSQL, Zod

- Architected multi-tenant real estate platform supporting brokers, agents, owners, and builders through role-isolated dashboards.
- Built RBAC middleware using Next.js and Supabase Auth with PostgreSQL Row Level Security for tenant-level isolation.
- Developed property discovery APIs with PostgreSQL full-text search, indexed filtering, and cursor-based pagination.
- Implemented operational dashboards and WhatsApp-integrated workflows tailored for Indian real estate operations.

BeatYesterday - Offline-First Workout PWA

beatyesterday.kalipr labs.in

React, TypeScript, Vite, IndexedDB, Zustand

- Built installable offline-first workout tracking PWA using IndexedDB persistence and Service Worker caching.
- Designed modular analytics and challenge systems with centralized Zustand-based state management.
- Developed workout trend analytics, CSV export workflows, and share-card generation using Recharts and Web APIs.
- Implemented responsive mobile-first UI optimized for offline interaction and fast client-side performance.

EXPERIENCE

Nexverse Digital Studio - Product and Web Developer (Founding Team)

Aug 2024–Jan 2025

Eureka Startup Club, GHRCEM, Pune

- Collaborated in a 4-member founding team to launch 3+ SaaS MVPs with rapid iteration and product validation.
- Conducted 10+ customer interviews and market validation studies for early-stage SaaS concepts.
- Contributed to startup pitches and hackathons, achieving Top-25 Finalist recognition at Barclays Capgemini Ideathon.

SKILLS

Languages	TypeScript	JavaScript	Python	SQL	
Frontend	React	Next.js	Tailwind CSS	Zustand	
Backend	Node.js	Express.js	FastAPI	Prisma	Supabase
Database	PostgreSQL	MySQL	Redis		
Tools and concepts	Docker	Git			

EDUCATION

Bachelor of Technology (B.Tech)

GH Rasoni College of Engineering and Management, Pune

2023–Present

CGPA: 8.24/10
